PROFESSIONAL SUMMARY

Computer Science (Computer Networking) graduate with practical experience in full-stack web development, backend systems, and automation projects. Proficient in JavaScript, PHP, Python, MySQL, and RESTful API development, with a strong foundation in Linux, networking, and system administration. Built multiple academic and real-world projects involving web applications, Raspberry Pi automation, and database-driven systems. Eager to contribute as a Software Engineer while leveraging both software development and infrastructure knowledge to deliver reliable and scalable solutions.

EDUCATION

UNIVERSITI TEKNIKAL MALAYSIA MELAKA (UTEM), MELAKA
BACHELOR'S DEGREE IN COMPUTER SCIENCE (COMPUTER NETWORKING)
2021 – 2025 | CGPA: 3.49

POLITEKNIK UNGKU OMAR (PUO), IPOH
DIPLOMA IN INFORMATION TECHNOLOGY
2018 – 2021 | CGPA: 3.90

EXPERIENCE

HQ Perbadanan Kemajuan Negeri Selangor (PKNS) – SHAH ALAM, SELANGOR

IT Support / Internship

OCT 2024 – PRESENT

- Monitored and maintained HQ network infrastructure to ensure stable connectivity and minimal downtime for daily operations.
- Prepared network tender documentation and evaluated vendor proposals to support network refresh initiatives.
- Analyzed existing network topology and implemented VLAN segmentation for newly established departments, improving network organization and efficiency.
- Collaborated with senior IT personnel to troubleshoot and resolve network and infrastructure-related incidents.
- Maintained and updated the PKNS website landing page using HTML, CSS, and Bootstrap to improve user experience and visual presentation.

AIM Connections Sdn Bhd – DAMANSARA, SELANGOR

INTERN – IT Technician

March 2021 – July 2021

- Maintained and optimized the Passenger Information System (PIS) web application through updates, troubleshooting, and security checks to ensure service availability.
- Installed and configured network switches supporting PIS infrastructure, improving system reliability and operational performance.
- Conducted on-site troubleshooting and maintenance activities to identify root causes and minimize service disruptions.

PROJECT HIGHLIGHTS

Job Application Tracking System | Personal Project

Technologies: PHP, HTML, CSS, JavaScript, SQLite, Docker, Virtualization, Linux

- Designed and developed a web-based job application tracking system using PHP, JavaScript, and SQLite to centralize job applications, interview schedules, and application progress.
- Implemented CRUD operations, dashboard reporting, search, and filtering capabilities, enabling efficient tracking and management of job opportunities.
- Deployed the application in a self-hosted home lab environment using Proxmox VE, Ubuntu Server, Docker, and Docker Compose to simplify deployment and maintenance.

- Developed the complete solution independently, including database design, backend development, frontend implementation, and infrastructure deployment.

Smart Automated Gate System | UTeM Final Year Project

Technologies: Python, OpenCV, PHP, MySQL, Raspberry Pi, Linux

- Developed an automated vehicle access management system using Raspberry Pi and license plate recognition technology.
- Implemented image processing and license plate recognition modules using Python and OpenCV.
- Integrated PHP and MySQL backend services for vehicle registration, verification, and access logging.
- Developed a web-based administration portal for monitoring and managing access records.
- Integrated hardware, software, and database components into a complete end-to-end solution.

Bus Ticketing System | UTeM Academic Project

Technologies: C++, MySQL

- Developed a ticket booking and management system with CRUD functionality and database integration.
- Implemented modules for ticket registration, booking management, record updates, and reporting.
- Applied object-oriented programming principles and database operations to support business workflows.

Enterprise Network Infrastructure Simulation | UTeM Academic Project

Technologies: Active Directory, DNS, DHCP, Samba, Cisco Routing & Switching

- Designed and implemented an enterprise network environment incorporating Active Directory, DNS, DHCP, TFTP, Samba, and inter-VLAN routing.
- Configured Cisco routers and switches to support segmented network communication and routing services.
- Implemented centralized user authentication and network services to simulate real-world enterprise infrastructure.
- Performed network testing and troubleshooting to validate service availability and connectivity.

Portable Secure Media Server | PUO Final Year Project

Technologies: Raspberry Pi, Linux, Samba, Wi-Fi Networking, NAS

- Developed a portable media server using Raspberry Pi to provide secure file storage and media sharing services over a local wireless network.
- Configured Linux-based network services and file sharing mechanisms to enable access from laptops and mobile devices.
- Implemented user authentication and access control features to improve data security and privacy.
- Designed the system to function independently without internet connectivity, making it suitable for portable and travel use cases.
- Performed system configuration, testing, and troubleshooting to ensure reliable media access and file transfer operations.

CERTIFICATIONS

- Huawei HCIA Datacomp Completion Courses
- Dean's List Award Semester 1-7 Universiti Teknikal Malaysia Melaka
- Dean's List Award Semester 1-6 Politeknik Ungku Omar

SKILLS

Soft Skills: Problem-Solving, Communication, Teamwork & Collaboration, Analytical Thinking, Adaptability

Technical Skills: Full-Stack Web Development (HTML, CSS, JavaScript, PHP, Node.js), Frontend Development (HTML, CSS, Bootstrap, Responsive Design), Backend Development and RESTful API Development, Database Design and Management (MySQL, SQLite), Programming Languages (JavaScript, PHP, Python, C++, SQL), Version Control (Git/GitHub), Containerization and Deployment (Docker, Docker Compose), Linux and Windows Server Administration, Automation and Scripting, Virtualization Technologies (Proxmox VE), Raspberry Pi Development and System Integration, Active Directory Fundamentals, Networking Fundamentals (TCP/IP, Subnetting, VLANs, DNS, DHCP), Router, Switch and Firewall Configuration (Cisco, Aruba, FortiGate, SonicWall), Network Troubleshooting and Infrastructure Support.

Languages: Malay (Native), English (Intermediate)
