PROFESSIONAL SUMMARY

Computer Science (Computer Networking) graduate with hands-on experience in network infrastructure, Linux administration, and full-stack web development. Skilled in PHP, JavaScript, Python, MySQL, networking, and troubleshooting systems. Seeking opportunities in Network Engineering, IT Infrastructure, Systems Administration, or Software Development.

EDUCATION

UNIVERSITI TEKNIKAL MALAYSIA MELAKA (UTEM), MELAKA

BACHELOR'S DEGREE IN COMPUTER SCIENCE (COMPUTER NETWORKING)

2021 – 2025 | CGPA: 3.49

POLITEKNIK UNGKU OMAR (PUO), IPOH

DIPLOMA IN INFORMATION TECHNOLOGY

2018 – 2021 | CGPA: 3.90

EXPERIENCE

HQ Perbadanan Kemajuan Negeri Selangor (PKNS) – SHAH ALAM, SELANGOR

IT Support / Internship

OCT 2024 – PRESENT

- Monitored and maintained HQ network infrastructure, ensuring stable connectivity and minimizing service disruptions across daily business operations.
- Assisted in preparing network tender documentation and evaluating vendor proposals for infrastructure upgrade projects, supporting procurement and implementation activities.
- Participated in network infrastructure enhancement projects by designing and implementing VLAN segmentation, improving network scalability, security, and operational efficiency.
- Performed network and infrastructure troubleshooting activities, diagnosing and resolving connectivity, configuration, and service-related issues to maintain operational stability.
- Enhanced and maintained the PKNS website landing page using HTML, CSS, and Bootstrap, ensuring a responsive design, improved usability, and up-to-date content delivery.

AIM Connections Sdn Bhd – DAMANSARA, SELANGOR

INTERN – IT Technician

March 2021 – July 2021

- Maintained and optimized the Passenger Information System (PIS) web application through updates, troubleshooting, and security checks to ensure service availability.
- Installed and configured network switches supporting PIS infrastructure, improving system reliability and operational performance.
- Conducted on-site troubleshooting and maintenance activities to identify root causes and minimize service disruptions.

PROJECT HIGHLIGHTS

Job Application Tracking System | Personal Project

Technologies: PHP, HTML, CSS, JavaScript, SQLite, Docker

- Developed a web-based job application tracking system using PHP, JavaScript, and SQLite to manage applications, interview schedules, and application progress.
- Implemented CRUD operations, dashboard reporting, search, and filtering features to improve application tracking and management.
- Deployed the application in a self-hosted environment using Ubuntu Server, Docker, Docker Compose, and Proxmox VE.
- Independently handled database design, application development, and infrastructure deployment.

Smart Automated Gate System | UTeM Final Year Project

Technologies: Python, OpenCV, PHP, MySQL, Raspberry Pi

- Developed an automated vehicle access management system using Raspberry Pi and license plate recognition technology.
- Implemented image processing and license plate recognition modules using Python and OpenCV.
- Integrated PHP and MySQL backend services for vehicle registration, verification, and access logging.
- Developed a web-based administration portal for monitoring and managing access records.
- Integrated hardware, software, and database components into a complete end-to-end solution.

Bus Ticketing System | UTeM Academic Project

Technologies: C++, MySQL

- Developed a ticket booking and management system with CRUD functionality and database integration.
- Implemented modules for ticket registration, booking management, record updates, and reporting.
- Applied object-oriented programming principles and database operations to support business workflows.

Enterprise Network Infrastructure Simulation | UTeM Academic Project

Technologies: Active Directory, DNS, DHCP, Samba, Cisco Routing & Switching

- Designed and implemented an enterprise network environment incorporating Active Directory, DNS, DHCP, TFTP, Samba, and inter-VLAN routing.
- Configured Cisco routers and switches to support segmented network communication and routing services.
- Implemented centralized user authentication and network services to simulate real-world enterprise infrastructure.
- Performed network testing and troubleshooting to validate service availability and connectivity.

Portable Secure Media Server | PUO Final Year Project

Technologies: Raspberry Pi, Linux, Samba, Wi-Fi Networking, NAS

- Developed a portable media server using Raspberry Pi, providing secure file storage and media sharing services over a local wireless network.
- Configured Linux-based network services, file sharing, user authentication, and access control to enhance security and accessibility across devices.
- Performed system deployment, testing, and troubleshooting to ensure reliable media access and file transfer operations.

CERTIFICATIONS

- Huawei HCIA Datacomp Completion Courses
- Dean's List Award Semester 1-7 Universiti Teknikal Malaysia Melaka
- Dean's List Award Semester 1-6 Politeknik Ungku Omar

SKILLS

Soft Skills: Problem-Solving, Communication, Teamwork & Collaboration, Analytical Thinking, Adaptability

Technical Skills:

- PHP, JavaScript, Python, C++, SQL
- HTML, CSS, Bootstrap, RESTful API Development
- MySQL, SQLite
- Git, GitHub
- Linux, Windows Server
- Docker, Docker Compose
- Proxmox VE
- Raspberry Pi
- TCP/IP, VLAN, DNS, DHCP
- Cisco, Aruba, FortiGate, SonicWall
- Network Troubleshooting & Infrastructure Support
- AI & Productivity development tools

Languages: Malay (Native), English (Intermediate)
